EDUCATION

MAT, Maharaja Agresen Institute of Technology <i>B.Tech – Computer Science and Technology (CGPA: 7.7)</i>	2024 – 2028 <i>Delhi, India</i>
Laxmi Public School (Class XII) <i>Science Stream (PCM) (Score: 66.0%)</i>	2024 <i>Delhi, India</i>
Laxmi Public School (Class X) <i>Score: 81.6%</i>	2022 <i>Delhi, India</i>

TECHNICAL SKILLS

Languages: Java, Python, C/C++, HTML, CSS, JavaScript, SQL
Frontend: React.js, Next.js, Tailwind CSS,
Backend: Node.js, Express.js,
Tools: Git, Linux, VS Code, Vercel, Render
Core Competencies: Object-Oriented Programming (OOP), Data Structures, Algorithms, API Integration

PROJECTS

MediSync – Hospital Management System — React.js, Tailwind CSS, Supabase, PostgreSQL, Gemini API

- Developed a full-stack hospital management platform for patient records, appointments, prescriptions, and administrative workflows.
- Implemented secure role-based authentication using Supabase Auth and PostgreSQL Row-Level Security (RLS).
- Integrated Gemini API to build an AI-powered symptom checker for urgency assessment and department recommendations.

Chess-App — Flutter, Dart, BLoC

- Built a cross-platform chess application using Flutter and BLoC architecture with separate game logic and UI layers.
- Implemented legal move generation, turn-based gameplay, and board state management using object-oriented design principles.
- Deployed a single codebase across Android, iOS, Web, Windows, Linux, and macOS.

Netflix Clone — HTML5, CSS3, JavaScript, TMDB API

- Developed a responsive Netflix-inspired web application for browsing and searching movies and TV shows.
- Integrated TMDB and YouTube APIs to display real-time content, metadata, and trailers.
- Implemented dynamic content rendering and responsive UI using JavaScript, HTML, and CSS.

LANGUAGE

- English, Hindi

EXTRACURRICULAR

- Participated in Smart India Hackathon (SIH) 2024, collaborating in a team to design a scalable solution for a real-world problem and presenting system architecture through a technical PPT.
- Mentored junior students in C++ and Data Structures & Algorithms through structured offline sessions, strengthening problem-solving fundamentals.

CERTIFICATIONS

Claude with the Anthropic API	May 2026 – Present
Integrated LLMs into applications using APIs with focus on token optimization and error handling.	
Trust and Security with Google Cloud	March 2026 – Present
Learned IAM, data security, and cloud compliance fundamentals in Google Cloud.	
Prompt Engineering	May 2026 – Present
Applied few-shot prompting and chain-of-thought techniques to improve LLM outputs.	
Agent Skills Subagents	May 2026 – Present
Studied multi-agent systems and task decomposition for AI workflows.	
YUVA AI For All	Feb 2026 – Present
Learned fundamentals of AI, ethics, and responsible deployment.
